

WorkRamp Roadmap

Employee Learning & Customer Learning Cloud

Now (Next 3 months)	Next (Next ~6 months)	Later (Active Exploration)	Done (Recently Released)
<p>Academy Portal Localisation (CLC) Deliver a native language experience for global teams.</p>	<p>WorkRamp MCP Server (ELC) Connect AI agents directly to your learning data - query, report, and act without leaving your tools.</p>	<p>Elucidat integration (ELC+CLC) Seamless integration for world-class content authoring.</p>	<p>AI Simulations (ELC) Interactive, deeply contextual AI simulations and easy to configure simulations builder.</p>
<p>Guide Content API (ELC+CLC) Extract Guide content for use in your own tools.</p>	<p>Events Enhancements (ELC+CLC) Customer driven enhancements, plus improvements to our integrations & UI.</p>	<p>Contextual Analytics (ELC) Data insights personalized to your organization's goals, objectives and learning outcomes.</p>	<p>Prerequisites (CLC) Ensures learners have the necessary knowledge before accessing advanced materials</p>
<p>Automation Failed/Passed Triggers (ELC) Automate workflows based on whether a learner Passes or Fails</p>	<p>Challenge Enhancements (ELC) Smarter AI, greater flexibility for learners and admins.</p>	<p>AI Simulations in Academies (CLC) Your partners and customers practice the conversations that matter, before they happen</p>	<p>Custom Roles (CLC) Create and assign tailored, custom permission profiles for Academies</p>
<p>Improved Trash & Restore (ELC) Stability and admin experience.</p>	<p>UK Localisation (ELC+CLC) Introducing UK Date/Time and language.</p>	<p>File storage & knowledge base integrations (ELC+CLC) Your organization's knowledge seamlessly integrated with learning.</p>	
<p>Richer Collections (CLC) Now with Paths, Certifications, Events and Sub Collections.</p>	<p>Confirm Integration (ELC) Link your training directly to measurable performance.</p>		
<p>Bulk Contact Invite (CLC) Reduce friction for large-scale user onboarding and cohort launches</p>			

**Items on our roadmap are subject to change as requirements are defined.*

WorkRamp Roadmap

AI Simulations

Now (Next 3 months)	Next (Next ~6 months)	Later (Active Exploration)	Done (Recently Released)
Reporting Insights (Admin) Admin dashboard surfacing simulation activity, usage, progress and scores.	Assessments Introduce pre and post-simulation assessments.	Multiple characters Multi-character simulations for realistic conversations.	Refined authoring Simulation authoring improvements based on early adopter feedback.
Localisation (languages) Support for multiple languages, enabling simulations to be delivered in learners' preferred language.	Prologues and epilogues AI-generated short videos for simulation prologues and epilogues, including full video and audio editing.	Data integrations Salesforce and data warehouse connections.	Conversation enhancements Learner experience improvements based on early adopter feedback.
Global Settings Reusable characters, success criteria, and resources across simulations, reducing authoring time and improving consistency at scale.	Stories Configurable pathways including simulation, prologues and epilogues, confidence checks and assessments.	Gamification Badges and enhanced leaderboards.	Assigned & self-selected simulations Configurable learner journeys to access simulations.
Topics Introduce variants within simulations e.g. same scenario, different difficulties.	Simulations in the flow Simulations embedded into performance management workflows for real-time manager practise.	Learning recommendations Learners receive recommendations based on conversation feedback.	Initial launch version AI powered authoring incl. SME collaboration, audio and text conversations, memory, multi-attempt conversations, corrective feedback, configurable safety and privacy, analytics, and more.
